

Tabs

Include one tab for each line of body of functions in js files

Include one tab for each line of body of the CSS element

For every new start tag to end tag, include one tab for every line inside the tag. Every new tag inside a tag includes an extra tab inside that tag.

Whitespace

Include whitespace between arguments in a function

Comments

Include Comments that describe the functionality of the code for the web page

For every list element, include comments of start and end of the list. Also include all the elements and tag between those comments.

Line Limits

Line Length - maximum length of a line of code is 80 characters long
